

SOMA SHEKAR KEESARI

MSc Computer Science, University of East London | 2+ YoE | Java & Spring Boot | Full Stack Engineer

London, UK | +44 7553 449836

somashekarkeesari18@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner with 2+ years of software engineering experience building Spring Boot microservices and cloud-based applications. Improved API response times by 25%, reduced SQL query execution by 30%, and cut system downtime by 15% through performance optimisation, query tuning, and root-cause analysis. BSc Computer Science (Distinction) and developer of a production-ready ride-hailing platform and AI-powered financial analysis system integrating LLMs and ETL pipelines.

SKILLS

Functional Competencies: REST API Design | Microservices Architecture | Full-Stack Development | Query Optimisation | CI/CD Automation | Production Debugging | Root-Cause Analysis | System Monitoring | Code Review | Agile/Scrum | Prompt Engineering | ETL Pipelines | Cloud Computing | Software Testing | Distributed Systems

Technical tools: Java | Spring Boot | Python | JavaScript | TypeScript | React | SQL | PostgreSQL | MySQL | Docker | Jenkins | GitHub Actions | AWS | Anthropic Claude API | JUnit

EXPERIENCE

Backend Developer (Full-Time, 2 years) — Brane Group | Jul 2022 – Sep 2024

- Improved REST API response times on a high-volume Spring Boot transaction service through refactoring, query optimisation, and caching, reducing latency by 25%.
- Optimised PostgreSQL and MySQL query performance through indexing and database tuning, reducing SQL execution time by 30% for downstream consumers.
- Spearheaded the development of advanced CI/CD workflows with Jenkins and GitHub Actions, achieving a 40% reduction in deployment lead time and improving overall engineering velocity.
- Diagnosed production bottlenecks across Spring Boot microservices through monitoring, log analysis, and root-cause investigation, reducing system downtime by 15%.
- Mentored 3 junior developers through structured code reviews and Agile collaboration with 8+ engineers, reducing recurring defects by 20% and improving code quality.

PROJECTS

RideX — Full-Stack Ride-Hailing Platform

2025

React 19, Firebase, Stripe, Mapbox, Vercel

Live: uber-demo-omega.vercel.app | Code: github.com/shekar987/RideX-app

- Launched a full-stack ride-hailing app for 10,000+ users, featuring booking, driver acceptance, live tracking, payments, and trip completion, integrating Stripe, Mapbox, and Firebase.

- Architected a cloud-native backend, reducing query latency by 40% and enabling role-based access, persistent ride history, and real-time updates via Firestore and Realtime Database.
- Deployed a new application to production using continuous integration and deployment pipelines from GitHub to Vercel, achieving 99.9% uptime.

AI-Powered Financial Analysis System

2025

Python, Anthropic Claude API, pandas

Code: github.com/shekar987/finsight-financial-chatbot

- Built a Python ETL pipeline that parses SEC 10-K filings for Microsoft, Tesla, and Apple into structured, analysis-ready datasets covering revenue, margins, and operational metrics across multiple years.
- Integrated the Anthropic Claude API with custom prompt engineering, iteratively tuning prompts to improve factual accuracy and reduce hallucination on numerical financial data.
- Delivered a natural-language interface that answers analytical questions over multi-year filings — surfacing growth, margin, and performance indicators directly from the source data.

EDUCATION

MSc Computer Science (Industrial Placement) Jan 2025 – Jan 2027

University of East London

- AWS-accredited programme focused on Software Engineering, Cloud Computing, and AI applications.

BSc Computer Science, Jul 2019 – Jul 2023

Keshav Memorial Institute of Technology, India

- Graduated with Distinction; coursework in Data Structures, OOP, Databases, and Software Engineering.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Amazon Web Services
- **Java Developer Certificate** — CodSoft

RIGHT TO WORK

- Full-time work authorised during MSc Industrial Placement.
- Eligible for the UK Graduate Route visa upon MSc completion in January 2027
